Owner release checklist: full branch, Phase27

No deployment done here. Use the130-file pack in deploy-payload.md, never the old117-file pack. Owner accepts the release after these checks; local tests do not certify hosting or speed. Links below use https://ilmerastudyabroad.com.

(a) Before deploying

Download ALL live public_html files, hidden files, root/child .htaccess and hosting/PHP settings. Store the backup outside web access, verify it opens and confirm how to restore it. Record the old file list. Keep host-panel access and an offline/rollback window ready.

Run PageSpeed Insights **mobile** on the current Phase13 live pages. Save dated result links/screenshots and fill this table. Use the same URLs/device settings afterward; retain every run. If a URL is absent, record its status/no baseline. The choosing guide was added after Phase13: never use a404 score or another page as its baseline.

Before: page	LCP	CLS	Performance score
/	___	___	___
/services	___	___	___
/study-in-germany	___	___	___
/study-abroad-counselling-mysuru	___	___	___
/blog/how-to-choose-study-abroad-consultant-karnataka	___	___	___

(b) Upload method

Git deployment: use a private checkout of the session branch outside public_html, then publish only the manifest130 files. Never expose the whole checkout or .git. If filtering is unavailable, use manual upload.

Manual: upload/extract only the verified pack contents into public_html, without an extra wrapper folder. Enable hidden-file transfer. Keep9 runtime JSON inputs and all8 .htaccess files; reports/tools get deny files only. No other internal contents. Reconcile obsolete files against the backup, not overwrite-only copying.

(c) Open on mobile and desktop

- **Home:** navigation/photos work; three even-height team cards, exact bios below.
- **About:** same cards; biography FAQs open; Udyam number UDYAM-KR-18-0023330 and business-registration-only/no-authority-endorsement caveat.
- **Services:** student charge ₹3 lakh to ₹15 lakh, university fees separate, university-payment disclosure, written policy terms not yet published.
- **Contact:** same disclosure and Udyam/caveat; working form and existing contact links.
- **/blog/:** published article cards load. **Choosing-consultant article:** readable guide, author image, FAQs and disclosure.
- **Germany:** plain navy hero, readable sourced guide/FAQs. **Mysuru:** gradient hero, light reading areas, unique local guide/FAQs. Neither has missing fonts/images.
- **/404:** Page Not Found, noindex, shortened footer. Also test an invented URL: HTTP404, not soft200; verify host error-page routing.

Jabir: Jabir KJ is the Founder of ILMERA Study Abroad. He is responsible for university research, admissions and application guidance.

Zaheer: Zaheer KJ is the Chief Financial Officer of ILMERA Study Abroad. He manages ILMERA's finance, paperwork and documentation.

Fawaz: Fawaz BH is the Chief Marketing Officer of ILMERA Study Abroad and an independent SEO, AEO and GEO consultant based in Kodagu.

About's full Fawaz FAQ keeps his diploma; Zaheer's full FAQ matches his card. All38 page URLs/headings: phase-27-public-url-checks.tsv.

(d) Unwanted text; (e) discovery

Find in visible text/source: **digital marketer**, **free**, **tuition-free**, **co-founder**. Flag every hit. Known substring-only matches: Services says “freely”; the held APS canonical URL contains “free”. See phase-27-raw-wording-hits.json; do not rename URLs or mistake these for a fee promise.

/sitemap.xml: exactly38 unique URLs; no APS, DSU, Czech Republic or Russia page. /robots.txt, /llms.txt and /llms-full.txt load; LLMs show the current Zaheer bio and no held promotion.

(f) Private URL checks

Each link must finish at403/404, with no file contents/listing. Full list: phase-27-internal-url-checks.txt. These are clickable full live URLs, including files present in the pack.

Check	Check
/.git/HEAD	/README.md
/CHANGELOG.md	/flagged-items-for-verification.md
/phase14-source-review.json	/phase14-location-review.json
/phase14-article-review.json	/phase14-validation.json
/destinations-facts-template.csv	/places-facts-template.csv
/data/team.json	/data/proof.php
/data/entity.json	/data/seo-map.json
/includes/posts.php	/destinations/germany.php
/places/mysuru.php	/reports/owner-inputs-needed.md
/tools/check_discovery.py	/assets/fonts/.htaccess

(g) Fonts and headers

Open each live font; check GET and HEAD in browser Network/hosting tools:200, Content-Type **font/woff2**, Cache-Control **public, max-age=31536000, immutable**. Confirm CSP permits self fonts and destination data fonts. Cold/warm pages and blocked-font fallback must stay readable; local adapter did not prove native headers.

Live font URLs	Live font URLs
Outfit300	Outfit400
Outfit500	Outfit600
Outfit700	Cormorant400
Cormorant700	Exact hashes: phase-25-release-check.md

(h) Contact form

Send one clearly labelled owner test using your own details. Confirm validation/errors AND actual inbox/provider receipt, not merely a success message. Record time/status; redact personal details when reporting. Check phone/WhatsApp links too.

(i) Mobile speed after upload

After: same page	LCP	CLS	Performance score
/	___	___	___
/services	___	___	___
/study-in-germany	___	___	___
/study-abroad-counselling-mysuru	___	___	___
/blog/how-to-choose-study-abroad-consultant-karnataka	___	___	___

For **each page**: LCP no more than10% worse (after<=before x1.10), CLS<0.1, performance score no more than5 points lower (after>=before-5). Missing/unusable results are unverified, not passes. This compares the whole combined release, not design alone. No local performance certification is claimed.

(j) Rollback and diagnosis

If anything fails, disable public access at the host panel. Restore the exact backed-up files/settings and .htaccess; remove new files absent from that backup, especially private JSON/runtime inputs. Do not leave new private files with protection removed.

For500: first restore backed-up root .htaccess. While access stays disabled, finish the exact backup restore/remove new files; then delete newly uploaded child .htaccess in data/, includes/, destinations/, places/, reports/, tools/ if uploaded. Restore old child versions instead where they existed; restore font rules too. Recheck the old site before reopening.

Send back: failing URL, screenshot/error status and before/after PageSpeed numbers/result links. No passwords or private enquiry/certificate details.

(k) Search Console, after owner acceptance

Resubmit https://ilmerastudyabroad.com/sitemap.xml. Use URL Inspection to request indexing for Karnataka, Germany, Italy, UK and the choosing-consultant guide. Record outcomes; requests do not guarantee indexing/rankings. Never request the four held pages.
